

RTS23 Wall switch modular

Format 55 double rockers

The RTS23 wall switch from the Format 55 range is a battery-powered Easywave transmitter. The function of the wall switch is defined by combining it with different rockers.

The radio switch can be integrated into cover frames with a cut-out dimension of 55 x 55 mm produced by various manufacturers (see compatibility list).

The transmitter module is combined with the desired rocker, simply clipped into the cover frame and is immediately operational. It can then be mounted on the wall using either adhesive pads or screws.

The RTS23 is generally used as a light switch to turn lights ON or OFF with a 2-button operation as well as to control roller shutters.

Please order the rockers separately!
